EDUCATION

PURDUE UNIVERSITY

West Lafayette, IN

Bachelor of Science in Artificial Intelligence

Expected May 2027

Math Minor, Finance Minor, Entrepreneurship Certificate

- **Sigma Nu Fraternity** - *Public Relations Chairman*
 - Strategically managed and grew social media presence to achieve a following of 2,200
 - Forged partnerships with Red Bull, Celsius and others to sponsor events & provide merchandise
- **Purdue Hackers**
 - Developed and pitched 5 software projects at university hackathons, including a Python application to visualize global housing costs with geospatial heat maps
- **Purdue Blood Initiative** - *Volunteer*
 - Contributed to campus-wide blood drives leading to 500+ donations among the student body

EXPERIENCE

ANU - AI-driven Ag-tech startup

Evansville, IN

Software Development Engineer Intern

May 2025 - July 2025

- Re-architected a legacy configuration system from .NET and C# into a full-stack solution using Python, React, and Node.js to manage and interface with physical IoT devices
- Developed a dynamic configuration menu allowing users to control device parameters in real-time, including lighting, photo capture, AI model integration, and mechanical speeds
- Engineered a data pipeline to automatically pull information from physical hardware and upload it into a MongoDB database for system-wide integration and analysis

CP Handheld - Web-based software for Automotive

Newburgh, IN

Software Engineer Intern

May 2023 - July 2023

- Trained in foundational software development, database management, and EE principles
- Gained hands-on experience with MariaDB, MySQL, C, & Raspberry Pi for hardware integration

INDEPENDENT SOFTWARE PROJECTS

HyperFit (iOS)

July 2025 - Present

Sole Developer

- Developed a workout planning app with a modern UI using Swift and SwiftUI, featuring intuitive navigation and customized routine creation
- Integrated Firebase Authentication for secure user profiles and utilized SwiftData for robust local data persistence of workout history

Atlas Protection (Web Application)

July 2025 - Present

Co-Developer

- Engineered a scam detection web app using React and TypeScript that analyzes user-uploaded text, audio, and images
- Implemented a DistilBERT NLP model for scam analysis and deployed the app in a scalable cloud environment using Docker and Microsoft Azure
- 800+ active weekly users

BoilerNotes (Web Application / iOS)

September 2025 - Present

Sole Developer

- Developed a study companion as a Next.js, React, and Typescript web app with a native iOS client in Swift and SwiftUI, pairing a structured notes workflow with calendars, material ingest, and AI-driven practice tooling.
- Integrated Firebase Authentication for cross-platform sign-in and stored notes, quizzes, events, and study assets in PostgreSQL via Drizzle, using Gemini and Groq plus client-side OCR and ingestion paths to produce quizzes and Rapid Learn decks from uploaded content.
